Subject Index of Volume 48

Acetone
condensation of, using metal hydroxide and hydrous metal oxide catalysts, 117
Acrolein
selective oxidation of propene to, on VO_x/TiO_2 systems containing Na, 381
Alcohol(s)
allyl; hydroformylation of, catalyzed by Ru(III)–EDTA complex using CO and water as source of H, 7
benzyl; development of immobilized Rh catalyst for carbonylation of, 21
cyclohexanol and cyclohexanone; catalytic conversion of cyclohexylhydroperoxide to, 129
some glycols in perchloric acid media; mechanism of Ru(III) catalysis in *N*-bromoacetamide oxidation of, 207
3-methyl-1-butyn-3-ol; ligand property and ligand concentration control in oligomerisation of, with $Ni(CO)_4$ and P-ligands as catalytic system, 81
primary; oxidation of, in alkaline media catalyzed by Cu complexes; chemical models of enzymatic oxidation, 157
Alkaline media
oxidation of primary alcohols in, catalyzed by Cu complexes; chemical models of enzymatic oxidation, 157
Alkanes
ethane or propane; electronic effects in Ru–metal oxide catalysts on hydrogenolysis of, 123
methylcyclohexane dehydrogenation; determination of specific activity for, of different surface orientations of Pd-supported catalysts, 199
n-heptane; comparison of catalytic properties of zeolites HZSM-20 and HY in cracking of, 373
Alkenes, Olefins
catalysis of Co–Schiff base complexes in oxygenation of; mechanism of ketonization, 249
cyclohexene; hydroformylation of, under low pressure with $Rh_4(CO)_{12}$; evidence in favour of homogeneous cluster catalysis, 59
cycloocta-1,5-diene isomerization; silica-supported Ru and Os carbonyls as catalysts for, 29
electrode-mediated catalytic carbonylation of, 15
1-hexene; efficient water-soluble Ru hydroformylation catalyst for exclusive formation of 1-heptaldehyde from, 313
olefin catalytic hydrogenation; kinetics and mechanism of, in presence of hydrido cluster $(\mu\text{-H})_2Ru_3(\mu_3\text{-O})(CO)_5(dppm)_2$; Ru cluster catalysis, 285
olefin dimerizations; preparation of divalent Pd(II) species on sepiolite and its catalysis of, 343
photoinduced metathesis and other reactions of, by Group VI metal carbonyls, 43
propene; selective oxidation of, to acrolein on VO_x/TiO_2 systems containing Na, 381
Alkynes
new interlamellar montmorillonite-silylphosphinepalladium(II) complex for stereo and shape selective hydrogenation of, 151
Aluminium
cobalt stearate–aluminium alkyl catalyzed hydrogenation of substituted quinolines, isoquinoline and naphthalene, 277
Amine
kinetic study of carbonylation of diethylamine and triethylamine catalyzed by water soluble $K[Ru^{III}(EDTA{-}H)Cl]\cdot 2H_2O$ complex in aqueous medium, 325

© Elsevier Sequoia/Printed in The Netherlands

Ammonia
facile synthesis of urea by carbonylation of, 25
Aromatic compounds
novel Ce(IV)-based conjunction catalyst for aromatic hydroxylation, 349
cobalt(II) chloride catalyzed normal pressure carbonylation of aryl halides, 11
cobalt stearate–aluminium alkyl catalyzed hydrogenation of substituted quinolines, isoquinoline and naphthalene, 277
development of immobilized Rh catalyst for carbonylation of benzyl alcohol, 21
kinetics and mechanism of oxidative dehydrogenation of 1,2-diphenylhydrazine with molecular O_2 catalyzed by triphenylphosphinecobaloxime(II), 265
kinetics and mechanism of phase-transfer catalyzed oxidation of *p*-xylene by molecular oxygen, 335
mechanistic studies on Pd-catalyzed double carbonylation of aryl iodides affording α-keto esters, 69
Rh-catalyzed hydroformylation with substituted phenylphosphate ligands, 319
Autoxidation
metal complex-catalyzed; correlation between oxidation potentials of complexes and rate parameters determined by kinetic modelling, 3

Boron
nature of organic radical intermediates in vicinal interchange reactions catalyzed by coenzyme B_{12}, 1
Bromoacetamide
mechanism of Ru(III) catalysis in *N*-bromoacetamide oxidation of some glycols in perchloric acid media, 207

Carbon monoxide
and SO_2; reaction of, over Cu–mordenite, 365
and water as source of H; hydroformylation of allyl alcohol catalyzed by Ru(III)–EDTA complex using, 7
Carbonylation
of benzyl alcohol; development of immobilized Rh catalyst for, 21
cobalt(II) chloride catalyzed normal pressure, of aryl halides, 11
of diethylamine and triethylamine catalyzed by water soluble $K[Ru^{III}(EDTA–H)Cl]\cdot 2H_2O$ complex in aqueous medium; kinetic study, 325
electrode-mediated catalytic, of olefins, 15
of NH_3; facile synthesis of urea by, 25
Pd-catalyzed double, or aryl iodides affording α-keto esters; mechanistic studies, 69
Carbonyls
Group VI metal; photoinduced metathesis and other reactions of olefins by, 43
silica-supported Ru and Os, as catalysts for cycloocta-1,5-diene isomerization, 29
Catalytic properties
comparison of, of zeolites HZSM-20 and HY in cracking of n-heptane, 373
Cerium
novel Ce(IV)-based conjunction catalyst for aromatic hydroxylation, 349
Chlorine
cobalt(II) chloride catalyzed normal pressure carbonylation of aryl halides, 11
Cluster
hydroformylation of cyclohexene under low pressure with $Rh_4(CO)_{12}$; evidence in favour of homogeneous cluster catalysis, 59
Ru cluster catalysis; kinetics and mechanism of olefin catalytic hydrogenation in presence of hydrido cluster $(\mu\text{-H})_2Ru_3(\mu_3\text{-O})(CO)_5(dppm)_2$, 285
Cobalt
catalysis of Co–Schiff base complexes in oxygenation of alkenes; mechanism of ketonization, 249
cobalt(II) chloride catalyzed normal pressure carbonylation of aryl halides, 11
cobalt stearate–aluminium alkyl catalyzed hydrogenation of substituted quinolines, isoquinoline and naphthalene, 277
kinetics and mechanism of oxidative dehydrogenation of 1,2-diphenyl-

hydrazine with molecular O_2 catalyzed by triphenylphosphinecobaloxime(II), 265
Coenzyme
B_{12}; nature of organic radical intermediates in vicinal interchange reactions catalyzed by, 1
Colloids
Cu, stabilized by water-soluble polymers:
application as catalysts for dihydrogen evolution, 231
preparation and properties, 217
Condensation
of acetone using metal hydroxide and hydrous metal oxide catalysts, 117
Copper
chemical models of enzymatic oxidation; oxidation of primary alcohols in alkaline media catalyzed by Cu complexes, 157
Cu colloids stabilized by water-soluble polymers:
application as catalysts for dihydrogen evolution, 231
preparation and properties, 217
reaction of CO and SO_2 over Cu–mordenite, 365
Cracking
comparison of catalytic properties of zeolites HZSM-20 and HY in, of n-heptane, 373
Cyclohexanone
and cyclohexanol; catalytic conversion of cyclohexylhydroperoxide to, 129
Cyclohexene
hydroformylation of, under low pressure with $Rh_4(CO)_{12}$; evidence in favour of homogeneous cluster catalysis, 59
Cyclohexylhydroperoxide
catalytic conversion of, to cyclohexanone and cyclohexanol, 129
Cytochrome P-450 models
ethyl oleate oxygenation by, 175

Dehydrogenation
methylcyclohexane; determination of specific activity for, of different surface orientations of Pd-supported catalysts, 199
oxidative; kinetics and mechanism of, of 1,2-diphenylhydrazine with molecular O_2 catalyzed by triphenylphosphinecobaloxime(II), 265
Dihydrogen evolution
Cu colloids stabilized by water-soluble polymers; application as catalysts for, 231
Dimerizations
olefin; preparation of divalent Pd(II) species on sepiolite and its catalysis of, 343

Electronic effects
in Ru–metal oxide catalysts on hydrogenolysis of ethane or propane, 123
Enzymes
chemical models of enzymatic oxidation; oxidation of primary alcohols in alkaline media catalyzed by Cu complexes, 157
coenzyme B_{12}; nature of organic radical intermediates in vicinal interchange reactions catalyzed by, 1
Esters
mechanistic studies on Pd-catalyzed double carbonylation of aryl iodides affording α-keto esters, 69

Group VI metal carbonyls
photoinduced metathesis and other reactions of olefins by, 43

Halides
aryl; cobalt(II) chloride catalyzed normal pressure carbonylation of, 11
Heptaldehyde
1-; efficient water-soluble Ru hydroformylation catalyst for exclusive formation of, from 1-hexene, 313
Hydrocarbons
mechanisms of skeletal rearrangements of, on metal; elementary steps, 99
Hydroformylation
of allyl alcohol catalyzed by Ru(III)–EDTA complex using CO and water as source of H, 7
of cyclohexene under low pressure with $Rh_4(CO)_{12}$; evidence in favour of homogeneous cluster catalysis, 59
efficient water-soluble Ru, catalyst for exclusive formation of 1-heptaldehyde from 1-hexene, 313
Rh-catalyzed, with substituted phenylphosphate ligands, 319

Hydrogen
hydroformylation of allyl alcohol catalyzed by Ru(III)–EDTA complex using CO and water as source of, 7
Hydrogenation
cobalt stearate–aluminium alkyl catalyzed, of substituted quinolines, isoquinoline and naphthalene, 277
Ru cluster catalysis; kinetics and mechanism of olefin catalytic hydrogenation in presence of hydrido cluster $(\mu\text{-H})_2Ru_3(\mu_3\text{-O})(CO)_5(dppm)_2$, 285
stereo and shape selective, of alkynes; new interlamellar montmorillonite-silylphosphinepalladium(II) complex for, 151
Hydrogenolysis
electronic effects in Ru–metal oxide catalysts on, of ethane or propane, 123
Hydrous metal oxide
condensation of acetone using metal hydroxide and hydrous metal oxide catalysts, 117
Hydroxylation
aromatic; novel Ce(IV)-based conjunction catalyst for, 349

Immobilization
development of immobilized Rh catalyst for carbonylation of benzyl alcohol, 21
Iodine
mechanistic studies on Pd-catalyzed double carbonylation of aryl iodides affording α-keto esters, 69
Isomerization
cycloocta-1,5-diene; silica-supported Ru and Os carbonyls as catalysts for, 29

Ketonization
mechanism of; catalysis of Co–Schiff base complexes in oxygenation of alkenes, 249

Metal hydroxide
condensation of acetone using metal hydroxide and hydrous metal oxide catalysts, 117
Metathesis
photoinduced, and other reactions of olefins by Group VI metal carbonyls, 43
Molecular sieves
polarizability of; ^{129}Xe NMR chemical shifts and sorption energetics, 37
Montmorillonite
new interlamellar montmorillonite-silylphosphinepalladium(II) complex for stereo and shape selective hydrogenation of alkynes, 151
Mordenite
reaction of CO and SO_2 over Cu–mordenite, 365

Nickel
ligand property and ligand concentration control in oligomerisation of 3-methyl-1-butyn-3-ol with $Ni(CO)_4$ and P-ligands as catalytic system, 81

Oleate
ethyl oleate oxygenation by cytochrome P-450 models, 175
Olefins: see Alkenes
Oligomerisation
ligand property and ligand concentration control in, of 3-methyl-1-butyn-3-ol with $Ni(CO)_4$ and P-ligands as catalytic system, 81
Oligosilazanes
catalytic synthesis of, 183
Osmium
silica-supported Ru and Os carbonyls as catalysts for cycloocta-1,5-diene isomerization, 29
Oxidation
enzymatic: chemical models of; oxidation of primary alcohols in alkaline media catalyzed by Cu complexes, 157
metal complex-catalyzed autoxidation; correlation between oxidation potentials of complexes and rate parameters determined by kinetic modelling, 3
N-bromoacetamide; mechanism of Ru(III) catalysis in, of some glycols in perchloric acid media, 207
phase-transfer catalyzed, of *p*-xylene by molecular oxygen; kinetics and mechanism of, 335
selective, of propene to acrolein on VO_x/TiO_2 systems containing Na, 381
Oxygen
kinetics and mechanism of oxidative

dehydrogenation of 1,2-diphenylhydrazine with molecular O_2 catalyzed by triphenylphosphine-cobaloxime(II), 265
kinetics and mechanism of phase-transfer catalyzed oxidation of *p*-xylene by molecular oxygen, 335
Oxygenation
of alkenes; catalysis of Co–Schiff base complexes in; mechanism of ketonization, 249
ethyl oleate, by cytochrome P-450 models, 175

Palladium
determination of specific activity for methylcyclohexane dehydrogenation of different surface orientations of Pd-supported catalysts, 199
new interlamellar montmorillonite-silylphosphinepalladium(II) complex for stereo and shape selective hydrogenation of alkynes, 151
mechanistic studies on Pd-catalyzed double carbonylation of aryl iodides affording α-keto esters, 69
preparation of divalent Pd(II) species on sepiolite and its catalysis of olefin dimerizations, 343
Perchloric acid media
mechanism of Ru(III) catalysis in *N*-bromoacetamide oxidation of some glycols in, 207
Phosphorus
new interlamellar montmorillonite-silylphosphinepalladium(II) complex for stereo and shape selective hydrogenation of alkynes, 151
kinetics and mechanism of oxidative dehydrogenation of 1,2-diphenylhydrazine with molecular O_2 catalyzed by triphenylphosphine-cobaloxime(II), 265
ligand property and ligand concentration control in oligomerisation of 3-methyl-1-butyn-3-ol with $Ni(CO)_4$ and P-ligands as catalytic system, 81
Rh-catalyzed hydroformylation with substituted phenylphosphate ligands, 319
Photoinduction
photoinduced metathesis and other reactions of olefins by Group VI metal carbonyls, 43

Polarizability
of molecular sieves; ^{129}Xe NMR chemical shifts and sorption energetics, 37
Polymers
Cu colloids stabilized by water-soluble polymers:
application as catalysts for dihydrogen evolution, 231
preparation and properties, 217
Potassium
kinetic study of carbonylation of diethylamine and triethylamine catalyzed by water soluble $K[Ru^{III}(EDTA{-}H)Cl]\cdot 2H_2O$ complex in aqueous medium, 325

Rhodium
development of immobilized Rh catalyst for carbonylation of benzyl alcohol, 21
hydroformylation of cyclohexene under low pressure with $Rh_4(CO)_{12}$; evidence in favour of homogeneous cluster catalysis, 59
Rh-catalyzed hydroformylation with substituted phenylphosphate ligands, 319
Ruthenium
efficient water-soluble Ru hydroformylation catalyst for exclusive formation of 1-heptaldehyde from 1-hexene, 313
electronic effects in Ru–metal oxide catalysts on hydrogenolysis of ethane or propane, 123
hydroformylation of allyl alcohol catalyzed by Ru(III)–EDTA complex using CO and water as source of H, 7
kinetic study of carbonylation of diethylamine and triethylamine catalyzed by water soluble $K[Ru^{III}(EDTA{-}H)Cl]\cdot 2H_2O$ complex in aqueous medium, 325
mechanism of Ru(III) catalysis in *N*-bromoacetamide oxidation of some glycols in perchloric acid media, 207
Ru cluster catalysis; kinetics and mechanism of olefin catalytic hydrogenation in presence of hydrido cluster $(\mu\text{-}H)_2Ru_3(\mu_3\text{-}O)(CO)_5(dppm)_2$, 285

silica-supported Ru and Os carbonyls as catalysts for cycloocta-1,5-diene isomerization, 29

Schiff base
catalysis of Co–Schiff base complexes in oxygenation of alkenes; mechanism of ketonization, 249
Sepiolite
preparation of divalent Pd(II) species on sepiolite and its catalysis of olefin dimerizations, 343
Silicon
catalytic synthesis of oligosilazanes, 183
new interlamellar montmorillonite-silylphosphinepalladium(II) complex for stereo and shape selective hydrogenation of alkynes, 151
silica-supported Ru and Os carbonyls as catalysts for cycloocta-1,5-diene isomerization, 29
Sodium
selective oxidation of propene to acrolein on VO_x/TiO_2 systems containing, 381
Specific activity
determination of, for methylcyclohexane dehydrogenation of different surface orientations of Pd-supported catalysts, 199
Spectroscopy
polarizability of molecular sieves; ^{129}Xe NMR chemical shifts and sorption energetics, 37
Stearate
cobalt stearate–aluminium alkyl catalyzed hydrogenation of substituted quinolines, isoquinoline and naphthalene, 277
Sulphur dioxide
and CO; reaction of, over Cu–mordenite, 365
Synthesis
catalytic, of oligosilazanes, 183
facile, of urea by carbonylation of NH_3, 25

Titanium
selective oxidation of propene to acrolein on VO_x/TiO_2 systems containing Na, 381

Urea
facile synthesis of, by carbonylation of NH_3, 25

Vanadium
selective oxidation of propene to acrolein on VO_x/TiO_2 systems containing Na, 381

Water
Cu colloids stabilized by water-soluble polymers:
application as catalysts for dihydrogen evolution, 231
preparation and properties, 217
efficient water-soluble Ru hydroformylation catalyst for exclusive formation of 1-heptaldehyde from 1-hexene, 313
hydroformylation of allyl alcohol catalyzed by Ru(III)–EDTA complex using CO and water as source of H, 7
kinetic study of carbonylation of diethylamine and triethylamine catalyzed by water soluble $K[Ru^{III}(EDTA-H)Cl]\cdot 2H_2O$ complex in aqueous medium, 325

Xenon
polarizability of molecular sieves; ^{129}Xe NMR chemical shifts and sorption energetics, 37
Xylene
kinetics and mechanism of phase-transfer catalyzed oxidation of *p*-xylene by molecular oxygen, 335

Zeolites
comparison of catalytic properties of zeolites HZSM-20 and HY in cracking of n-heptane, 373
